

FNA samples with histopathology reference  
(N = 569)

Stratified 70/30 split (seed = 42):

- Training set (model fitting): n = 398
- Test set (index-test evaluation): n = 171

Test set: index tests applied  
(n = 171)

Histopathology reference standard applied to all  
(malignant = 64, benign = 107)

Index test positive  
(n = 61)

Index test negative  
(n = 110)

Reference positive (malignant)  
TP = 60

Reference negative (benign)  
FP = 1

Reference positive (malignant)  
FN = 4

Reference negative (benign)  
TN = 106
